

ABG BLACKDATA STATEMENT OF WORK

About this Statement of Work

Seller:

Anderson Brooks Group India Pvt Ltd

Purchaser:

Solaris Solutions

This Statement of Work (SOW) Contract is fictitious. The company names, addresses, locations, people names, email addresses, phone numbers, product names, dates and prices are not real. This contract was created as an example SOW Contract for testing and development purposes ONLY and bears no legal basis whatsoever.

Customer receiving ABG services (if different from Purchaser):

XYZ Exchange Limited

Prepared by Vincent Vega

Issue date: **23rd April 2024**

Unless signed by both parties, this SOW and the prices herein will expire 30 days from the date of issue.

This ABG BlackData Statement of Work ("SOW") is governed by the following terms in descending order of precedence:

1. This SOW
2. ABG aaS Commercial Terms <https://www.abg.com/psnow/doc/ xxx2>
3. ABG aaS Terms for Partners <https:// xxx1.ext.abg.com/doc/ xxx3>
4. ABG Partner Agreement

Solaris Solutions understands and agrees to provide to the Customer:

- the delivery-related information in section 5 (Service Details) of this SOW
- the applicable service descriptions identified in this SOW including any Data Privacy and Security Agreement applicable to the Service referenced in the service description.
- ABG aaS Terms for Customers (<https://www.abg.com/xxx1/doc/ xxx4>)

Non-Disclosure

The information (data) herein constitutes trade secrets and/or information that are commercial or financial and confidential. It is furnished in confidence with the understanding that it will not, without permission of the offeror, be used or disclosed for purposes other than those provided herein, unless otherwise required by law.

1. SOLUTION FOR XYZEX LIMITED

- In particular, the ABG aaS Solution provides Customer with ABG Servers & Storage for deployment Database and Virtual Machine environment.

2. ORDERING

2.1 Will Purchaser issue a purchase order?

- Yes

2.2 Order Information

Purchase orders (if required) must reference the following information in order to be valid:

- **SOW ID:** OPE-0072958361
- **Description:** ABG BlackData
- **Estimated year 5 contract value:**
- **Estimated expenses (exclusive of taxes):** 78,000,000.00

2.3 Addresses

Customer Invoice address

- **Solaris Solutions**
- **Mr. Jules Winnfield**
- **505B, 3rd Floor, Octagon 8 (O-8), Karve Nagar, Maharashtra, Pune -411052. GST NO- 33ABFQQ9738F5YH**
- **8825679275**

3. DEFINITIONS AND ROUNDING

3.1 Definitions

Terms not defined herein are otherwise defined in the ABG aaS Terms for Customers and/or the ABG aaS Commercial Terms.

- **Billing Tiers:** A particular System or component of a System with unit pricing.
- **Buffer Capacity** Is additional capacity above the Requested Capacity, which is not initially invoiced. If during System Term usage exceeds Requested Capacity, Reserved Capacity will increase to the current Installed Capacity, which will be then invoiced monthly for the remaining System Term.
- **Early Termination Fees:** Defined in section 6.3.2.
- **Installed Capacity:** The total Units of Measure represented by installed Systems.
- **Powered-On Server:** A server within an enterprise IT infrastructure that is currently running and operational. It is actively processing tasks and services, consuming power, and contributing to the organization's computing capacity.
- **Requested Capacity:** Requested Capacity is the number of Units of Measure required over the term agreed to with the Customer. Requested Capacity may increase through the contract change management process documented in the Account Support Plan ("ASP").
- **Reserved Capacity:** The Commitment expressed as number of UOMs and a percentage of Requested Capacity.
- **Service(s):** The services, detailed in the Agreement, that ABG will perform for the Customer, including the provision of ABG intellectual property and Systems for Customer's access, if applicable.
- **System Term:** The Commitment term pertaining to a System.
- **Trigger Capacity:** The extent of Customer's usage triggering change order negotiations for adding more Buffer Capacity through the delivery and installation of new Systems.
- **Used CPU cores:** The number of central processing unit (CPU) cores that are actively utilized by running applications and processes on a server or computing system. It indicates the portion of available CPU resources

in use.

- **Variable Capacity:** The amount of UOMs available for Pay per use usage in excess of the Reserved Capacity.
- **MRC:** Monthly recurring colocation charges as defined in section 4.3.
- **NRC:** Non-recurring colocation charges as defined in section 4.4.
- **Written Usable GB/GiB/TB/TiB:** The amount of data that has been written to the disk drives in the array after RAID and HA options and after applying data reduction techniques such as compression or deduplication. This metric reflects the effective storage space consumed by data.

3.2 Rounding

Numbers resulting from metering of Services, as well as making calculations required by the Agreement may be rounded.

4. SOLUTION-SPECIFIC COMMERCIAL TERMS

4.1 ABG BlackData Scaled Solutions

4.1.1 Payment model

ABG BlackData Scaled Solutions Services are subject to the Subscription with a Pay per use option payment model as set out in section 5.3 of the ABG aaS Commercial Terms, however, both Subscription and Pay per use fees will be invoiced in arrears.

4.1.2 System Term start date and Service availability date

The System Term starts and Service is available upon the earlier of

- The Customer using the Systems, or
- The Service availability date provided by ABG.

Any Service that is billed separately from Systems will be subject to its own Service availability date provided by ABG.

4.1.3 Pricing

The Reserved Capacity fee is payable irrespective of actual usage. Consumption-based charges will be calculated by multiplying any metered usage of Variable Capacity (or Buffer Capacity if applicable) in excess of the Reserved Capacity by the applicable UOM price provided. The Reserved Capacity must be included in determining the applicable rate band in section 6.1. The UOM rate in the applicable rate band will apply to the entire Reserved Capacity and the entire Variable Capacity usage (as well as the entire Buffer Capacity usage if applicable).

Any Service component or Service subject to fixed recurring or non-recurring charges together with the applicable recurring or non-recurring charges.

4.1.4 Metering

a. Storage

Storage (Written Raw GB/GiB/TB/TiB and Written Usable GB/GiB/TB/TiB) is considered used when data is sent from a server and written to the disk drives in the array as determined from the data collected by the metering tools. Data is collected daily, and usage is the average storage space in use over the month.

b. Compute

Physical cores usage (Used CPU Cores) is measured in utilization percentage. A physical core is considered used if its daily average utilization is greater than 3%, as collected by the metering tools. Daily usage is the total number of physical cores with usage greater than 3% in a day. The monthly average of the applicable daily usage will be taken.

Powered-On Server usage: servers need to be physically switched on/off to register a state change.

c. ABG-provided software

For an ABG provided software product that is directly licensed to individual hardware devices or other variable/quantifiable condition, ABG BlackData Central will be updated monthly, with the number of ABG licenses used (for example, License per CPU).

For an ABG provided software product that is licensed at an environment wide level (for example, not dependent on the amount of hardware deployed or other variable/quantifiable condition), the charge would be fixed per month irrespective of usage.

4.1.5 Pricing in the case of metering issues

If daily usage data cannot be collected by the metering scripts for more than two calendar days (including delays in implementing the metering script), ABG will send the Customer an email indicating that daily usage data cannot be gathered. The Customer will immediately assist ABG in resolving the problem.

a. If this issue continues for up to 30 days and

- Usage data has already been collected, then Seller will use the usage data from the day immediately preceding the failure for that 30-day period.
- No usage data has been collected, then Seller will use the mid-point between the Installed Capacity and the Reserved Capacity for that 30-day period.

b. If the issue continues beyond 30 days, one of the following will apply until the daily usage data issue is resolved:

- If the cause is attributable to the Customer, the billable amount will be equal to the Installed Capacity.
- If the cause is attributable to ABG, the billable amount will be equal to the Reserved

Capacity. If the cause is due to unidentified or unforeseeable external factors (in other words, neither ABG nor

Customer has directly contributed to the failure through action or inaction), the billable amount will be equal to the mid-point between the Installed Capacity and the Reserved Capacity.

4.1.6 Price Adjustments

Prices are calculated upon the Customer's estimated average growth per year through the System Term.

Seller and Purchaser will negotiate equitable changes to the prices and fees in good faith if:

- a. A material adverse change in Customer's financial or operating condition has occurred since the Agreement was signed,
- b. Customer does not meet the annual growth rate assumption as stated herein, or
- c. The Partner-led experience isn't delivered by the Reseller as a result of which the Service cannot be delivered to its specifications, therefore, a change from the Partner-led experience-level to another one becomes necessary.

5. SYSTEMS AND SERVICES

5.1 System 1

5.1.1 Service descriptions

- **ABG BlackData Scaled Solutions**, included services level: <https://www.abg.com/xxx1/doc/xxx5>
 - **ABG BlackData Entry services experience**
<https://www.abg.com/xxx1/doc/xxx6>

5.1.2 Delivery details

Customer name	XYZ Exchange Limited
Delivery site name	Primary Site
Delivery address	C/o Bolo Data Services Private Limited. 1st, P2 Level, 1, P2 Level, South Hampton Building, Survey No 29, Purina Developers Pvt. Ltd., Small Village Panorama, Tala, Panvel, Maharashtra - 630 682. GST No: 56BBCY3294E4YV
Customer contact name	Butch Coolidge
Customer contact phone	9995554743
Customer contact email	butch.coolidge@xyzex.com
Estimated service delivery start date	22nd July 2024
Term for this System	60 months, non-cotermminus.
Multi-vendor coverage period (if applicable)	NA

5.1.3 Technical configuration/Bill of Materials (BOM)

Note: A list of assets will be provided in the account support plan.

6. PRICING

6.1 Systems pricing

Additional Systems can be added through a mutually agreed change order.

ABG BlackData Price Bands				
Configuration	Billing Tier	UoM		Band 1
Server	XL9120 HyperV	Fixed Price	Volume	0 - 2

			Price	18,999.00
Server	XL9120 Oracle	Fixed Price	Volume	0 - 2
			Price	9,999.00
Storage	MDA5993 3.84TB	Fixed Price	Volume	0 - 1
			Price	38,999.00

6.2 Pricing Table

Config	Tier	Reserve Capacity	Reserved Quantity	Unit Price	UoM	Total per Month INR
Variable Payments - based on reserve capacity						
Server	XL9120 HyperV	100%	2.00	18,999.00	Fixed Price	37,998.00
	XL9120 Oracle	100%	2.00	9,999.00	Fixed Price	19,998.00
Storage	MDA5993 3.84TB	100%	1.00	38,999.00	Fixed Price	38,999.00
TOTAL monthly INR						96,995.00

6.2.1 Annual growth rate assumption

ABG BlackData Projected Growth								
Configuration	Billing Tier	UoM	Start Capacity	End of Y1	End of Y2	End of Y3	End of Y4	End of Y5
Server	XL9120 HyperV	Fixed Price	2	2	2	2	2	2
Server	XL9120 Oracle	Fixed Price	2	2	2	2	2	2
Storage	MDA5993 3.84TB	Fixed Price	1	1	1	1	1	1

6.3 Charges

6.3.1 Pricing Mechanism and the Monthly Price

The basic pricing factor is the Subscription fee for the Commitment and any Pay per use fee for Consumption in excess of the Commitment.

The Subscription fee for the Commitment is also called the Reserved Capacity fee. The Pay per use fee for Consumption in excess of the Commitment is also called the Variable Capacity fee and/or the Buffer Capacity fee if a Buffer Capacity is included instead.

For ABG BlackData Scaled Solutions Monthly price ("**Monthly Price**") is calculated by adding together the following:

- Any usage above the Commitment multiplied by the applicable UOM price for each Billing Tier (Pay per use fee)

- The applicable Subscription fee for each Billing Tie
- Any other applicable fixed monthly charges any other applicable fees or charges included in section 6

Delay fee

If System installation services are delayed for a cause not attributable to ABG, on the 31st day from delivery of the System, ABG will start invoicing Customer a delay fee monthly in arrears. The delay fee is calculated as follows: 1/30th of monthly Commitment (Reserved Capacity) of impacted billing Tiers charged daily as defined. Example: If Commitment (Reserved Capacity) is \$30,000/month then the delay fee would be \$1,000 a day. A 25-day delay would equal a fee of \$25,000.

6.3.2 Early Termination Fees

- Termination for convenience by Purchaser, termination by Seller for Purchaser uncured breach or insolvency
 - In the event of such termination of the Agreement or any System before the expiration of the initial System Term, including termination before the start of the System Term, the Purchaser must pay Early Termination Fees, calculated as follows:
 - For each impacted System: The Commitment at the time of the termination x applicable UOM price for each Billing Tier in the System per month x the number of months remaining in the affected System Term
 - For fixed monthly charges: The sum of any monthly fixed charges x the number of months remaining in the affected System Term
 - For optional software or Services: any Early Termination Fees.
- Purchaser will finally settle all liabilities arising out of any termination in accordance with this section upon payment in full of Seller's final invoice, which will include:
 - Early Termination Fees (unless contained in a separate debit note if applicable)
 - Any outstanding Subscription (Reserved Capacity) fees and Pay per use (Variable/Buffer Capacity) fees and Service charges
 - Return Fee as set out in the first paragraph of section 4.1.4 of the aaS Commercial Terms.
- Termination by Purchaser for Solaris Solutions uncured material breach or insolvency
 - In the event of termination by Purchaser for an uncured Solaris Solutions material breach or Solaris Solutions insolvency event, Purchaser will be relieved of the Early Termination Fees and the Return Fee.

6.3.3 Invoice Breakdown

Seller will invoice Purchaser monthly in arrears for

- The Monthly Price
- Any applicable additional charges (Early Termination Fees (unless contained in a debit note if applicable), Return Fee etc.)
- Any applicable taxes (such as, sales, value-added tax [VAT], goods and services tax [GST] or similar taxes or fees including stamp duty)

If this Agreement contains multiple Systems the charges set forth in this section 6.3 may be calculated and invoiced separately for each System.
